Perspectives on Cellular Regulation presents a collection of papers describing the research approaches, accomplishments, and viewpoints of some of today's leading investigators engaged in diverse areas of cell and molecular biology.

This volume is dedicated to the prominent scientist Arthur B. Pardee. It highlights his many continuing contributions to modern biochemistry, with chapters discussing his groundbreaking current research and that conducted by his former students and postdoctoral fellows, past and present.

Perspectives on Cellular Regulation examines:

- Regulation of gene expression • Cell cycle control in prokaryotes and eukaryotes • Growth control in eukaryotic cells • Chromosome structure • Signal transduction • Cellular differentiation • Tumor cell biology • Molecular evolution.

Table of Contents (Section Heads)

From Chromosome Structure to Morphogenesis in Prokaryotes • Chromosome • Cell Cycle • Gene Expression • Normal and Abnormal Growth and Differentiation in Eukaryotes • Signal Transduction • Growth and Development • Tumor Cell Biology • Cell Cycle • Molecular Evolution • Index.

MBL Lectures in Biology, Volume 11

ISBN: 0-471-56090-1 • LC 90-26568 • May 1991 • 374 pages, \$59.50

All orders should be sent to: **C. Dyges-Brown, Assistant Promotion Manager, Wiley-Liss, 605 Third Avenue, New York, NY 10158-0012.** For telephone orders: 1-800-225-5945 or (908) 469-4400, Fax: (908) 302-2300, Telex: 833434. Outside North America, order from your bookseller or from: John Wiley & Sons Limited • Baffins Lane • Chichester • Sussex PO19 1UD • England.

Please add appropriate state sales tax. All orders must be accompanied by payment or institutional purchase order. The publisher pays postage when payment accompanies order. Prices may be higher outside the U.S. All prices subject to change without notice.
